

HUDOMER

General Construction Company

Building Infrastructure.

Delivering Excellence.

Established: 2019

Headquarters: Addis Ababa,

situtiya@hudomer.com

ABOUT US

Hudomer General Construction Company is a dynamic Ethiopian construction firm specializing in delivering high-quality infrastructure projects with precision, speed, and innovation. While we operate across multiple construction sectors, our primary expertise lies in the **telecommunications industry**, where we have become a trusted partner for Safaricom Ethiopia and other leading players. Since 2024, Hudomer has played a pivotal role in expanding Safaricom Ethiopia's network, executing diverse projects including **Greenfield and Rooftop sites, Ground-Based Towers (GBT), collocation site works,** and power infrastructure upgrades.

Address: Hudomer General Construction

Our Work with Safaricom Ethiopia

We have successfully completed **full turn-key (FTK)** projects, from initial surveys to final handover, overcoming challenges such as difficult site access, flood-prone areas, and surface water issues. Our solutions have gone beyond telecom needs—such as constructing **access roads** that also benefit surrounding communities.

Key contributions include:

- Completion of **10 FTK sites** within a short time frame, meeting high quality and safety standards.
- Delivery of **colocation sites** in Ethiopian Telecom site for Safaricom , including **Colo plinth works** and **AC–DC power conversions**.
- Engineering problem-solving for challenging environmental conditions.

Recognition & Awards

Our commitment to excellence has been formally recognized by **Safaricom Ethiopia**.

On **July 1, 2025**, we were honored by Chief Safaricom Officer Mr. Wim Vanhelleputte for exceptional milestone achievements, including:

- **17.3 days** average from PO issuance to civil works start.
- **55.5 days** average from civil works start to Ready for Installation (RFI).
- **10 days** average from RFI to civil works completion.

Current Projects

Hudomer currently manages **53 FTK** sites across Ethiopia, located in:

- **Tigray Region**
- **Sidama Region**
- **SNNP Region**
- **Addis Ababa**
- **Oromia Region**
- **Bonga Cluster**

Progress to date:

- **51 sites completed**
- **21 sites ongoing**
- **10 sites in early stages** (survey, lease, BOQ, permits, geotechnical investigation,

Our Mission

To deliver world-class infrastructure solutions that empower communities, connect people, and drive Ethiopia's development. structural design)

Our Vision

To be Ethiopia's most trusted and innovative construction partner, recognized for excellence, speed, and social impact.

Our Values

- Quality First – We never compromise on standards.
- Innovation – Creative solutions for complex challenges.
- Integrity – Transparency and accountability in every project.
- Commitment – Delivering on time, every time.
- Community Impact – Building infrastructure that benefits society.

HELLO SOLAR

Empowering Smallholder Farmers
with PURE and Clean Cooking Solutions

Driving Climate-Resilient inclusive
Agriculture in Ethiopia

Established: 2019

Headquarters: Addis Ababa,

situtiya@hudomer.com

ABOUT US

“Hello Solar Technology is a social impact company providing locally assembled, decentralized solar energy solutions to people in off grid areas. We are committed to improving the daily life of rural communities by providing access to qualitative and affordable pay-as-you-go renewable energy services in Ethiopia.”

KEY FACTS

- **15,000 customers**
- **PayGo**
- **Local assembly**
- **Key partnerships**
- **Payment integrations**
- **Multi-channel distribution**
- **Dedicated regional teams**
- **End-to-end customer service**

Address: Hudomer General Construction

Clients and geographical reach

CLIENTS

- Off grid Communities
- Smallholder Farmers

Market size:

75% population: 95 million, 85% smallholder

5 billion \$

Plot size: 0.5 – 1.5 hectare

GEOGRAPHICAL REACH

- Active in 4 regions of Ethiopia
- Multi-channel distribution, tailored to regional needs:
- Agent network with 35 points of sale across five regions
- Partnership with Somali Microfinance Institution (Sharia compliant model)
- Partnership for farmers with TechnoServe in Gambella
- Partnership for farmers with JICA in Jimma
- Partnership with SHARPE/DAI for refugee camps in Somali region

Our solution: 4 Access to Clean Cooking, benefits

IMPORTANCE OF CLEAN COOKING

Health Benefits:

- 1-** Reduced Household Air Pollution (HAP): Clean cooking technologies significantly lower exposure to harmful pollutants like particulate matter (PM2.5) and carbon monoxide, According to the World Health Organization (WHO), HAP from traditional cooking causes around 3.2 million premature deaths
 - 2-** Decreased Disease Burden: Clean cooking reduces respiratory diseases, cardiovascular issues, and other conditions linked to HAP. Women and children, who spend more time near cooking areas, benefit the most.
 - 3-** Improved Child Health: Cleaner air reduces acute respiratory infections in children, a leading cause of under-5 mortality
-

Our solution: 4 Access to Clean Cooking, benefits

IMPORTANCE OF CLEAN COOKING

Environmental gains:

- 1-** Lower Deforestation and Emissions: Clean cooking reduces reliance on biomass fuels, curbing deforestation and forest degradation.
- 2-** Climate Impact: Modern stoves or fuels like LPG emit less black carbon and greenhouse gases. Scaling clean cooking could contribute to climate goals, as traditional cooking accounts for roughly 2% of global CO2 emissions.

Economic and Social Benefits:

- 1-** Time and Cost Savings: Reduce fuel consumption by 30-60%, Save time spent collecting firewood, often 2-6 hours daily,
 - 2-** Gender Equity: Women, primarily responsible for cooking and fuel collection in emerging markets,.
 - 3-** Economic Growth: Scaling clean cooking markets creates jobs in manufacturing, distribution, and maintenance of stoves or fuels. The clean cooking sector could generate billions in economic activity.
-

Our solution: 4 Access to Clean Cooking, overview

SOLUTION FOR CLEAN COOKING, PRODUCT CATEGORIES

FUEL BASED STOVES:

- 1- Biomass stoves
- 2- LPG stoves
- 3- Ethanol stoves
- 4- Biogas stoves
- 5- Electrical stoves

KEY CONSIDERATION

- 1- Cost: Ranges from \$5 (basic biomass stoves) to \$200+
- 2- Accessibility: Biomass and LPG stoves are most common in emerging markets due to fuel availability, while electric and solar stoves are limited by infrastructure.
- 3- Emissions: LPG, ethanol, biogas, and electric stoves are Tier 4 (cleanest) on the WHO's stove performance scale, while improved biomass stoves range from Tier 2-3.
- 4- Cultural Fit: Adoption depends on compatibility with local

Our solution: 4 Access to Clean Cooking, Biogas

TARGET CUSTOMERS

Smallholder Farmers:

Land size: 0.5 – 1.5 Hectare

- Number:

15 million families (70% population, 95% smallholder)

- Market: 5 million+ bio digesters

=> Usage: Cooking, fertilizer

Industrial users:

- Large size agricultural production
- Livestock – milk
- Chicken farms
- Slaughterhouse => Usage: biogas digesters can to treat the waste of these facilities

Address: Hudomer General Construction
Office No.049, 4th Floor, Century Building,
Bole Brass, Woreda 03.

Our solution: 4 Access to Clean Cooking Biogas

FOCUS ON BIOGAS => Sistema.Bio

Our products

Sistema.bio is a hermetic, hybrid reactor that receives the daily waste of a farm, in which the manure mixed with water is fermented, producing biogas that is conducted through pipes to the points of use. At the other end of the system comes a powerful biofertilizer.

Durability

Pre-Fabricated hit

Variety of sizes

COUNTRY OBJECTIVE BIODIGESTERS
2025 – 2035 => 800.000 units

Hello Solar Sistem.Bio contribution:

20% of the country objective

1- 2025-2035 = > 160.000 units

2- Average 16.000 units/year

3- Gradual build up

Develop injera stove => 2026

Key Considerations for Biogas success

1- Cost to procure

2- Savings

Bio fuel savings

Fertilizer

20% more production of crops

3- Input materials, dung and water

4- Operating daily to keep consistency
